

GENTLEMAN, *START*
YOUR COMPRESSORS.

psi
TORQSTART

Give your compressors the extra boost they need with **TorQstart**.

Packard has combined its HVAC knowledge and years of experience in developing capacitors and relays to introduce **TorQstart** -- an all-in-one powerhouse which increases starting torque better than a capacitor alone.

TorQstart overcomes the heavy load of getting a compressor to start when pressures don't equalize.

With bleed resistor and quick connect terminals for fast installation, **TorQstart** will get you across the finish line and on to your next job.
